SUMMARY

Full-stack engineer with six years of experience, strongest on the frontend. Spent the last four leading a small team at Landin, a site builder used by over a million people. Comfortable owning the Node API, Docker setup and CI pipeline, not just the UI. Most recent work has been AI interfaces: streaming chat and MCP tooling. Maintainer of Unstream (200 stars) and Doran, an open-source Persian calendar toolkit.

EXPERIENCE

Landin — Senior Frontend Developer · Full-time 2022 – Present
No-code landing page builder, over a million users.

- Rebuilt the whole page editor on my own. It was desktop-only before; people can now build and edit a landing page from a phone.
- Led a team of three frontend developers, running code review, sprint planning and handoff with product.
- Shipped 20+ features and templates for the builder. Engagement was up 30% over that period.
- Built the shared component system the builder and its templates both run on.

React · Next.js · TypeScript · TailwindCSS · Redux · TanStack Query · Framer Motion

Ply — Frontend Engineer · Part-time 2025 – 2026
Design studio in the UAE building web products for clients.

- Built the AI chat interfaces, streaming responses token by token instead of waiting for the whole reply.
- Took three client projects from design handoff to production on Next.js 16 and React 19.
- Worked on Ply's own site and the shared frontend setup new client projects start from.

Next.js 16 · React 19 · TypeScript · shadcn/ui · Supabase · Zustand · AWS Amplify · Sentry

UrPlaza — Frontend Engineer · Freelance 2024
B2B and B2C marketplace platform.

- Only frontend developer on the project; built the client side from scratch.
- Set up the Next.js structure and a shadcn component library shared across the B2B and B2C sides.
- Owned state management for both.

Next.js · TailwindCSS · shadcn/ui · Zustand

Namaki — Co-founder & CTO · Part-time 2022 – 2023
Green-tech startup for household recycling pickup.

- Made the technical calls: architecture, database schema, and the API behind the app and admin panel.
- Built the MVP React Native app and the panel operators used to plan pickup rounds, with OpenStreetMap for routing.
- Set the roadmap and decided what got built next.

React Native · Next.js · Express.js · MongoDB · OpenStreetMap

- Built frontend features for the streaming site and the video player.
- Added keyboard shortcuts and subtitle handling to the player.
- Kept a separate Webpack and Babel build so the site still worked on old smart-TV browsers.

Nuxt.js · Video.js · Webpack · Babel · SCSS

- Built most of the frontend.
- Implemented the WebRTC layer for live video between students and teachers.
- Designed the classroom UI and reworked it as teachers reported what wasn't working.

React.js · Socket.io · WebRTC · Material UI · Express.js · MongoDB

OPEN SOURCE

Unstream 200 stars · github.com/amiralibg/unstream
Paste a Spotify, Apple Music, YouTube or SoundCloud link and get back tagged audio files you actually own. No account, no API key. React and TypeScript over a Python and FastAPI backend, running from a single *docker compose up*. Interface in both Farsi and English.

Doran 15 stars · github.com/amiralibg/Doran
Persian (Jalali) dates are badly served in JavaScript, so every project rewrites the same date math and gets different edge cases wrong. Doran is twelve packages around a zero-dependency date engine: a natural-language date parser, an Iranian holidays dataset, Zod schemas, an ESLint plugin, and accessible date pickers for React, Vue, Svelte, Angular and Web Components.

Marky & Redistal · Tauri, React, Rust
A Markdown editor that keeps its advanced features out of the way until you want them, and a native Redis GUI for macOS.

SKILLS

LANGUAGES	TypeScript, JavaScript, Python, HTML, CSS, Dart
FRONTEND	React, Next.js, Vue, Nuxt, React Native, TailwindCSS, shadcn/ui, SCSS, Material UI, Framer Motion
STATE & DATA	Zustand, Redux, TanStack Query
BACKEND	Node.js, Express.js, FastAPI, MongoDB, Postgres, Supabase, REST API design
AI	LLM integrations, streaming chat interfaces, MCP workflows, agentic systems, real-time AI UX
INFRA & TOOLS	Docker, CI/CD, AWS Amplify, Git, Vite, Webpack, Storybook, Jest, Vitest, Sentry
