

AMIRALI BEIGI

Senior Frontend Engineer • Next.js • TypeScript • AI-integrated Applications

Email: amirali@amirali.dev

GitHub: [amirali](https://github.com/amirali)

LinkedIn: [amirali](https://www.linkedin.com/in/amirali)

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 6+ years of experience building scalable web and mobile applications using React, Next.js, TypeScript, and modern frontend architectures.

Experienced in leading frontend development, shipping production-ready products, and collaborating closely with design, backend, and product teams. Strong focus on performance, developer experience, scalable UI systems, and modern product engineering.

Recently focused on AI-integrated applications, streaming AI interfaces, MCP workflows, agentic systems, and real-time user experiences.

CORE SKILLS

Category	Technologies
Frontend	React.js, Next.js, Vue.js, Nuxt.js, React Native
Languages	TypeScript, JavaScript, HTML, CSS, Dart
UI & Styling	TailwindCSS, shadcn/ui, SCSS, Material UI, Framer Motion
State & Data	Zustand, Redux, TanStack Query
Backend & infrastructure	Node.js, Express.js, MongoDB, Supabase, Docker, CI/CD
AI & Modern Tooling	LLM integrations, AI streaming interfaces, MCP workflows, Agentic systems, Real-time AI UX
Tools	Git, Webpack, Storybook, Jest, AWS Amplify, Sentry

PROFESSIONAL EXPERIENCE

Senior Frontend Developer — [Landin](#)

2022 – Present

Landin is a landing page builder platform used by more than 1 million users worldwide.

- Led and mentored a frontend team of 3 developers within an agile product environment.
- Architected and developed 20+ production features and templates across the builder ecosystem.
- Improved communication workflows between product and engineering teams, increasing sprint efficiency.
- Built scalable and responsive UI systems focused on performance and maintainability.
- Contributed to platform improvements that increased user engagement by 30%.

Technologies: React, Next.js, TypeScript, TailwindCSS, Redux, TanStack Query, Axios, Framer Motion

Frontend Engineer — [Ply](#)

2025 – 2026

Ply is a design and development studio building modern web products and digital platforms.

- Delivered and maintained multiple production projects for UAE-based clients.
- Built AI-powered chat interfaces with real-time response streaming.
- Collaborated closely with design and backend teams to ship production-ready features.
- Developed responsive, animation-rich user experiences using modern React ecosystems.
- Contributed to the main Ply marketing website and frontend architecture.

Technologies: Next.js 16, React 19, TypeScript, TailwindCSS, shadcn/ui, Supabase, Zustand, AWS Amplify, Sentry

Co-founder & CTO — [Namaki](#)

2022 – 2023

Green-tech startup focused on recycling and waste collection workflows.

- Designed the platform architecture and database structure.
- Built the MVP application, admin panel, and API infrastructure.
- Led technical roadmap planning and feature prioritization.
- Worked closely with product direction and early user feedback loops.

Technologies: React Native, Next.js, Express.js, MongoDB, OpenStreetMap

Senior Frontend Developer — Doreddy

2020 – 2021

Online education platform built during the COVID pandemic with real-time communication features.

- Led development of the majority of the frontend application.
- Implemented WebRTC-based real-time video communication.
- Designed highly interactive UI experiences for students and teachers.
- Improved usability and engagement through iterative product feedback.

Technologies: React.js, SCSS, Material UI, Socket.io, WebRTC, Express.js, MongoDB

Frontend Developer — Cinemac (Jcoders)

2021 – 2022

Streaming platform providing video-on-demand services to over 10,000 users.

- Developed frontend features for the streaming platform and media player experience.
- Improved accessibility and engagement through keyboard shortcuts and subtitle systems.
- Built compatibility support for older TV platforms through Webpack and Babel optimizations.

Technologies: Nuxt.js, Video.js, Webpack, Babel, SCSS

SELECTED PROJECTS

Developer - [Marky](#)

2026

OpenSource offline markdown editor for users that started with markdown recently and packed with advanced options to be their companion when they get better at markdown.

- Built the full app and developed all the parts.
- Design a Roadmap for the project to develop it on the track.

Technologies: Tauri, Reactjs, Zustand and...

Developer - [Doran](#)

2026.

Open-source Persian (Solar Hijri / Jalali) calendar ecosystem — a complete, accurate, and developer-friendly toolkit covering date math, natural-language parsing, holidays, and RTL-first UI, so any developer can ship Persian-calendar features without reinventing them.

- Architected and built the entire monorepo: an immutable, zero-dependency date engine (moment-jalaali parity), a Persian natural-language date parser, an Iranian holidays dataset, and accessible, WAI-ARIA keyboard-navigable React components and framework-agnostic Web Components.
- Designed the package boundaries, public APIs, release pipeline (changesets + CI), documentation
- site, and live demos to keep the project maintainable and contributor-friendly.

Technologies: TypeScript, React, Web Components, pnpm, Turborepo, Vitest, VitePress and...

Frontend Engineer — [UrPlaza](#)

2024

B2B/B2C business platform focused on marketplace infrastructure and business growth tools.

- Built the full frontend architecture and UI system independently.
- Collaborated closely with backend and design teams for production delivery.

Technologies: Next.js, TailwindCSS, shadcn/ui, Zustand and...

AI & Agentic Systems

- Built AI-integrated chat interfaces with streaming responses and real-time UX patterns.
- Worked with MCP-based workflows and modern AI product integrations.

- Designed conversational UI systems optimized for responsiveness and usability.
 - Integrated modern frontend architectures for AI-powered applications.
-

ADDITIONAL INFORMATION

- 6+ years of professional software engineering experience
- Strong experience working in startup and fast-paced product environments
- Comfortable leading frontend initiatives and collaborating cross-functionally
- Passionate about modern frontend systems, AI-assisted products, and developer experience
